## Proofpoint Services Offerings

# Proofpoint and information protection

---

Proofpoint information protection applies security solutions and other technologies, as well as processes and policies, to secure information. Protect your data against accidental mistakes, attacks and insider risk — across your cloud services, email endpoint and on-premises file shares. Leverage common classifiers honed over 10 years. Achieve fast time-to-value and optimize your end-user experience with a modern architecture that's easy to deploy and maintain.

With content classification, integrated threat intelligence and the power of rich contextual information, Proofpoint offers a powerful and unique method of protecting your data across the entire enterprise. HCLTech can help ensure that you make the most of those tools.

Partnering with Proofpoint Information Protection, HCLTech provides several advanced supporting services offerings to maximize your security, improve your return on investment and mature your organizational processes that govern information protection.

# Data protection program maturity assessment

---

Information protection is more than a set of security tools. When run effectively, information security is an organization-wide program that encompasses governance, strategic vision, deep data examination, remediation and a host of organizational integrations and touchpoints. Our industry-leading maturity assessment uses a proprietary methodology to assess your programs' current level of maturity and make practical, sophisticated recommendations for both tactical and strategic improvement.

## Advance policy

---

Authoring information protection policies today is about much more than configuring application settings. It is about a rich understanding of your organization's security needs, your business objectives and your practical capacity to provide incident remediation. Let our information protection experts help you set context and value to your internal processes by providing global and industry best practices for policy design, handling and evolution.

## Policy optimization service

---

Information protection policies can grow, evolve and even go stale over time, losing effectiveness and reducing their risk-mitigation capabilities. Our information protection experts will examine your policies in accordance with a detailed set of modern best practices. We provide recommendations, assistance or manpower to evolve your policies, mature your protection practices and tune protections to maximize your organization's safety.

# Methodology

---

Simply put, HCLTech's proven methodology works. Annually, we implement hundreds of security solutions for global customers across every imaginable industry.

## Optimize

1. Re-align integrations to meet changing business requirements
2. Assess alignment to best practices and LP Maturity Model
3. Develop action plans to achieve the desired level of maturity

## Design

1. Design technical architecture for desired components
2. Plan installation and operational turnover
3. Integrate solution with existing business processes

## Operate

1. Monitor environment and alignment of the deployed solution to the business requirements

## Assess

1. Define scope based on goals and business drivers
2. Document requirements based on scope
3. Define preliminary architecture requirements

## Transform

1. Deploy designed components of a LP program
2. Technology, process and people
3. Integrate and advance the solution to an operational state

# Why HCLTech Consulting Services cybersecurity consulting?

Our consultants deliver real-world value to help guide organizations improve their security postures through:

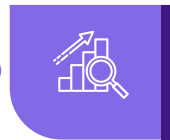

Real-life experience operating solutions in the world's largest and most complex networks

Direct access to internal product teams enabling faster diagnosis and resolution of issues

Utilize subject matter experts, proven methodologies, and industry best practices

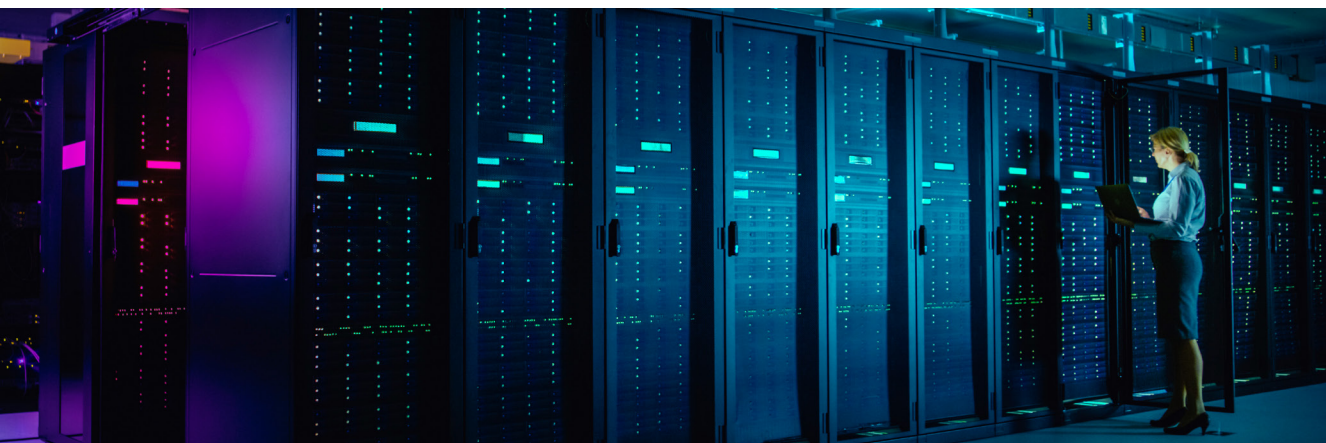

Optimize policies and procedures and engage measurable controls to realize greater program maturity

Informal training to improve your team's effectiveness

Derive increased value from your security products

# HCLTech | Supercharging Progress™
