

# CloudSMART

Bring the future  
into focus

Disruptions in the financial markets, supply chain, and climate extremes create challenges for global businesses. Iconic brands are battling neo-competitors for customer mindshare and competing on their ability to create the ultimate customer experience. Securing competitive positions in the global market requires high speed innovation. In response, businesses are designing digital transformation strategies to optimize critical applications and data with digital

technologies. HCLTech introduces CloudSMART for Continuous Cloud Modernization. CloudSMART provides a portfolio of offerings and services to enable your transformation journey and future proof your technology decisions. HCLTech's CloudSMART is helping companies achieve business goals while adopting modern and secure technologies for modernization.

## Cloud Modernization

---

The role of cloud is continuously evolving. Cloud centric innovation is driving cloud consumption. A high percentage of companies report the use of multiple clouds, and most have or are planning hybrid cloud implementations. By applying industry insights to your unique transformation journey we provide the technology depth and solutions to modernize your cloud strategy. Cloud modernization enables your business to fully utilize cloud dependent digital technologies like AI/ML, IoT and edge computing. By combining theory with practical, proven, and actionable solutions HCLTech collaborates with you to shape your transformation.

The modern cloud is at the heart of a successful business and technology strategy. Making fast and effective business decisions depends on having an agile technology framework. For example, a key application may require refactoring to take advantage of cloud resources; old applications may be retired and replaced with new applications, developed using agile methods to improve performance and resource utilization. Modernization requires adopting new processes and procedures to ensure ongoing adaptability, availability and performance of cloud infrastructure, applications and data on the cloud, modern networks to connect clouds, and security protocols to protect people and data.

## SMART Way to Cloud Modernization

---

HCLTech CloudSMART provides a comprehensive portfolio of offerings and services required for cloud modernization to support your digital transformation projects. CloudSMART provides a structured collaboration for business and IT leaders accelerating transformation projects that will require cloud. You can begin the journey with the CloudSMART Modernization Experience, an immersive, programmatic, and modular approach to modern cloud adoption.

During this engagement HCLTech collaborates with your team to explore process, policy, people, and platforms required for governance of the modern cloud. During the engagement, consultants and industry experts design the journey focusing on four stages: ideate, analyze, innovate, and execute. We bring the best engineering and R&D expertise to each engagement, supported by a network of next generation labs and cloud accelerators to deliver the innovations to power your transformation.

## CloudSMART Offerings: SMART Ways

---

CloudSMART features a portfolio of SMART Ways that take you to the cloud and provide services for operating in the cloud:

### Application Modernization

with specialized services for SAP modernization

### Data and AI Modernization

to help you efficiently manage the exponential increase of data and use analytics to gain insights you can use to quickly make critical business decisions

### Connected Cloud

ensures you can implement and manage the network infrastructure required for edge computing and IoT along with tackling the complexities of adopting and managing high speed 5G capabilities

### Cloud Managed Services

optimizes sustainability and provides management models to operate any number of clouds while controlling costs and increasing value

### Industry Solutions

applies our industry expertise driven by domain insights and cross industry best practices. From financial services, healthcare, life sciences to manufacturing, mining, telco, consumer goods and retail we can offer industrialized solutions to simplify complexity and allowing you to see results faster

We enrich your cloud investment by partnering with cloud providers like AWS, Microsoft, Google Cloud, IBM, SAP, and a host of technology partners like Intel, Cisco, VMware, and Dell Technologies.

## CloudSMART Advantages

---

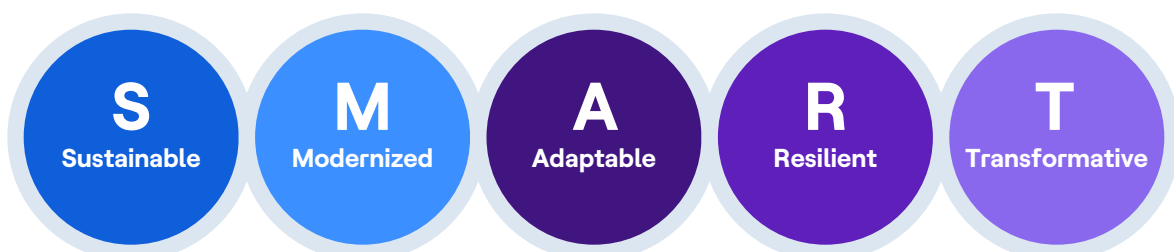

Over the last decade, organizations have moved quickly to the cloud and have sometimes left a trail of abandoned applications, software, and hardware choices. The cost of these projects has left organizations with technical debt. Technical debt can have a negative impact on funding for new projects. Working with HCLTech and implementing a cloud modernization plan enables IT to avoid these losses in the future.

CloudSMART enables you to avoid tempting short cuts that create more problems than they solve. For example, choosing to lift and shift an application to the cloud might address infrastructure challenges. CloudSMART gives you another choice. The Application Modernization SMART Way simplifies the choice for cloud-first and enables you to quickly adopt cloud-native software development processes and tools.

The SMART Way for Data and Analytics enables you to choose different databases for your systems that will improve performance and optimize utilization of resources. HCLTech provides best practices to migrate data and select the best database configurations and practices to fit your cloud use case, often driving performance improvements. Data without analytics limits your ability to make decisions. Your data strategy will provide results to improve business processes, improve the customer experience and drive profitable revenue.

We understand that your business will change over time. Your cloud strategy should be resilient and adaptable to change with your business strategy. The cloud isn't just a destination. At HCLTech we believe the cloud supports and surrounds your organization with the capabilities you need to do business. Business climates change, competitors come and go and by choosing HCLTech CloudSMART and SMART Ways you master the power of cloud to continuously modernize the applications, data practices, networks, and cloud operations to bring your future into focus.

# HCLTech | Supercharging Progress™

HCLTech is a global technology company, home to 211,000+ people across 52 countries, delivering industry-leading capabilities centered around Digital, Engineering and Cloud powered by a broad portfolio of technology services and software. The company generated consolidated revenues of \$11.79 billion over the 12 months ended June 30, 2022. To learn how we can supercharge progress for you, visit [hcltech.com](https://hcltech.com).
