

Enhance your cyber resiliency posture with **VaultNXT**

Powered by Cohesity

Ransomware threats are increasing due to accelerated digital transformation, cloud migration, remote working and geo-political tensions. CISOs and IT teams need a broader threat landscape to manage ransomware threats. Successful breaches that paralyze entire organizations and lead to significant financial and reputational losses for victims keep cybercriminals on the offensive.

As per a **Gartner Report**, businesses often recover only **65 percent** of their data after paying ransom, demonstrating that full data recovery is unlikely.

The frequency of ransomware attack in the year 2021 was every 11 seconds. This frequency is expected to rise to every 2 seconds by 2031.

Why cyber resiliency is important

Even after configuring adequate security measures, organizations are unable to deal with evolving ransomware threats. Therefore, being cyber resilient is essential to protecting your organization against potential attacks. Cyber resiliency is important for:

Improving business continuity in the event of a ransomware attack

Continuous business health check to identify potential risk, threats and vulnerability

Adhering to regulatory and governance rules

Quick recovery of business-critical data

Boosting data integrity and protection with no/minimal loss

To overcome these obstacles and ensure cyber resiliency, organizations are looking at new frameworks and solutions.

Enhance enterprise data protection with VaultNXT, powered by Cohesity

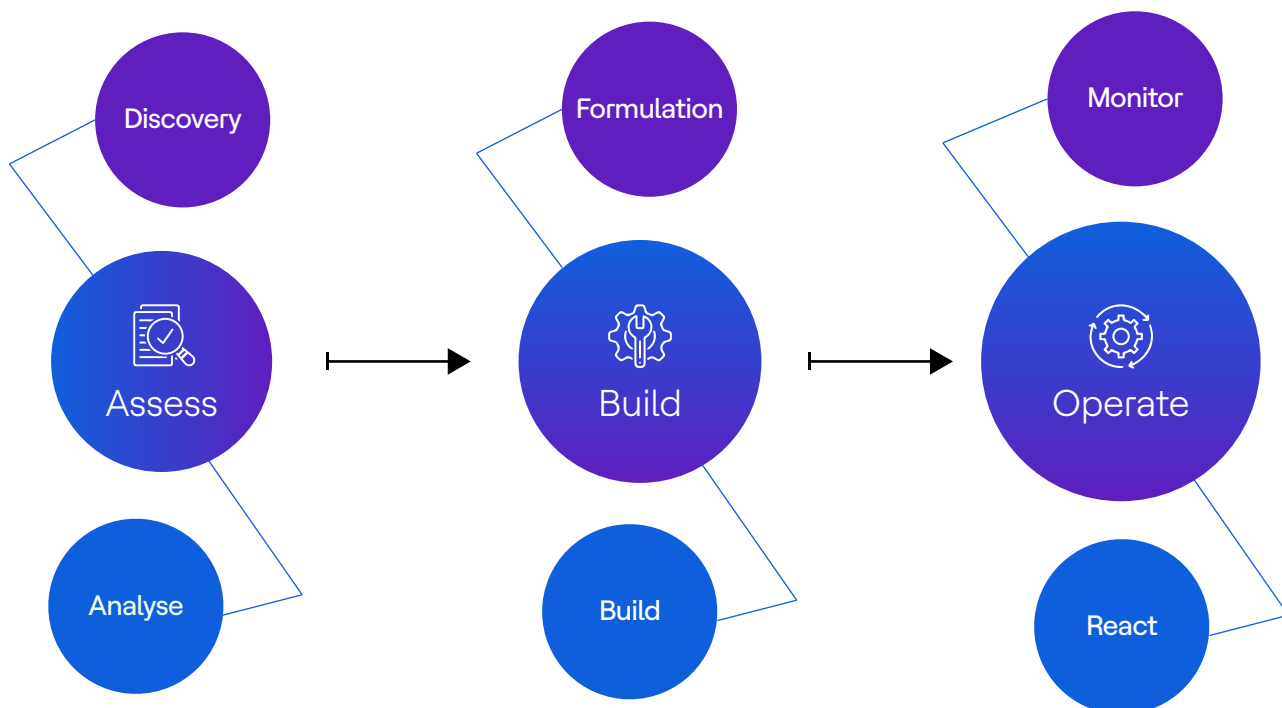

VaultNXT combines Cohesity's modern data security and management with proven HCLTech's managed services to deliver end-to-end cyber resilience solutions and services. Organizations choosing VaultNXT strengthen their data protection and boost agility—leaping from threat prevention to a holistic cyber security strategy—with the combination of HCLTech strategic services and Cohesity Data Cloud for modern data protection.

Overview

HCLTech and Cohesity provide expertise and innovation to protect critical data and maintain data integrity. This is delivered with proven data expertise and multi-layered innovations to organizations struggling to counter ransomware attacks.

The VaultNXT framework serves as the foundation and approach for creating, building and operating a cyber-resilient architecture featuring robust data management and SaaS data isolation.

The foundation is supported by a large team of trained HCLTech resources that continually work toward achieving enterprise objectives and cyber resiliency maturity with operational simplicity and efficiency.

Key features

- 01 Immutable snapshots, encryption, WORM rules and modern data isolation capabilities
- 02 Zero Trust security techniques such as least-privileged access, multi-factor authentication (MFA), role-based access controls (RBAC)
- 03 Comprehensive and native AI/ML-driven ransomware monitoring, investigation and alerts
- 04 Sensitive data monitoring and threat hunting to determine IOCs (indicators of compromise)
- 05 Global search to quickly locate data/infected files and take appropriate corrective action
- 06 Orchestrated, automated app and disaster recovery with minimal downtime

Key benefits

Improved security posture against ransomware attacks	Comprehensive cyber resilience strategy	Reduced downtime and rapid recovery at scale	Streamlined compliance	Rapid deployment through pre-validated reference architectures

Why HCLTech and Cohesity

- Recognized leadership**
Reports published by leading analyst firms (IDC, Everest Group, ISG, Avasant and Gartner) have recognized HCLTech as a leader in cloud services/strategy and they have validated the value in the Cohesity approach to data security and management.
- Proven success**
HCLTech provides infrastructure security, governance, risk and compliance management solutions, leveraging Cohesity's data security and management platform.
- Continued joint innovation**
The companies have invested in a joint innovation lab and dedicated center of excellence (CoE).

HCLTech | Supercharging
Progress™

HCLTech is a global technology company, home to 222,000+ people across 60 countries, delivering industry-leading capabilities centered around digital, engineering and cloud, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, Technology and Services, Telecom and Media, Retail and CPG, and Public Services. Consolidated revenues as of 12 months ending December 2022 totaled \$12.3 billion. To learn how we can supercharge progress for you, visit hcltech.com.
