

ideaX: SAP Virtual Innovation Lab

Supercharge business outcomes with SAP BTP

Deliver business value quickly with Innovation-as-a-Service

Innovation means challenging the now and expanding what's possible. And accessing ideas, inventions, and solutions on demand can accelerate your innovation journey and deliver rapid growth and business benefits.

That's why we offer ideaX, a virtual

innovation lab for SAP customers that drives value across the product chain, from ideation to co-innovation and development of purpose-driven solutions.

ideaX lets you design solutions remotely in a week and deliver a

Minimum Viable Product (MVP) with a POC in a month to deliver fast and tangible outcomes. Powered by the SAP BTP platform ideaX embodies our approach of using intelligent technologies to solve complex business problems, while keeping the core clean.

Harness SAP BTP's intelligent technologies to drive business value

SAP BTP is SAP's preferred platform for business extensions. Any SAP customer migrating to SAP S/4HANA following a clean core strategy needs to understand how to harness its capabilities. However, SAP BTP can be

challenging to adopt without proper understanding of its capability as a unified innovation platform.

This is where ideaX steps in. We align with your organizational vision and

SAP's roadmap and help you discover new opportunities through cross-industry collaboration and proactive engagement.

What ideaX delivers

Proactive engagement

We proactively engage with you to generate innovation opportunities, and present offerings and innovations that can add value to your business.

Cross-industry innovation

Innovation focuses on business processes and extends beyond any specific industry.

Quick business impacts

In virtual workshops, we work with stakeholders to understand your business problem and explore innovation ideas. We then iterate the solution and execute a quick PoC / pilot to realize the business impact.

Innovation that scales

The end goal of the Innovation Lab is to generate PoCs that you can scale – internally, or productize and take to market.

Faster realization of ideas using an agile approach

Think of ideaX as your one-stop shop to leverage the best of HCLTech's capabilities and SAP BTP talent – so you can quickly make processes more intelligent, scale your PoCs to productize, and take new innovations to market.

Understand technology trends

Explore the industry and technology trends that drive business benefits

Scale capability

Leverage our deep expertise in SAP BTP – ready pool of SME's

Scale PoCs

Scale your PoCs to productize. Take new innovations to market

Innovative offerings

Leverage our existing offerings to innovate

ideaX features and capabilities

Innovation workshops

Conduct agile innovation workshops with experts & SMEs

Collaborative design

Team executes collaborative design thinking using Mural

Assessment

Assess current SAP landscape to propose a future-ready roadmap

PoC & pilot

Develop PoCs against assessment and risk analysis of future transformations using our BTP environment

Innovation success stories

Leading mining company

ideaX for process automation and unified operations

Challenge

A leading client sought to unify its third-party processes into a single interface and incorporate rule-based automation without impacting existing business operations.

Solution

HCLTech helped consolidate processes into a single interface, integrated with REST APIs, and coupled with smart notifications and rule-based approvals.

Outcomes delivered

The cutting-edge, consolidated solution helped significantly reduce manual interventions and time to market.

Global chemical company

Enabling secure SAP S/4HANA mobile solutions

Challenge

As security of business data was a top priority, a leading chemical company was unable to use mobile browsers. They wanted to make SAP S/4HANA business processes accessible through mobile devices, leveraging a future-proof architecture to build more mobile apps.

Solution

We defined a SAP BTP mobility adoption strategy, and our SAP BTP solution was enabled with 'SAP Mobile Start' for quick setup, designed for easy onboarding and enhanced UX.

Outcomes delivered

We provided mobile-driven access to SAP S/4HANA business apps and enabled a secure way of exposing business data to open networks through mobile devices.

Oil and gas major

Closing HR process gaps with SAP BTP

Challenge

The customer wanted to close a process gap and enable notifications in SuccessFactors for background portlets such as education, certifications etc. The client also wanted to enable a 1:1 meeting notification manager for the Performance Management (CPM) Module.

Solution

SuccessFactors integration with SAP BTP for notifications. We leveraged SAP BTP Build-Process-Automation-based reusable generic solution for all kinds of notifications for SuccessFactors. The solution is currently being evaluated for event-driven integration between SuccessFactors and SAP BTP.

Outcomes delivered

The business process gap was addressed through an intelligent solution that optimized process efficiency.

Pricing

Our pricing catalog is flexible and tailored to the specific services and level of engagement required. The catalog provides indicative pricing, which may vary depending on the scope of the project.
