

Scale digital with HCLTech **ADvantage** **Workato**

A recipe for hyper automation

The digital economy views every business as a technology company for whom the time-to-market is a key differentiator. To aid enterprises in achieving its targets related to customer experience, operational excellence, and digital transformation, application integration has never been more critical to an organization's IT environment. Many enterprises have invested in integration platforms that lack a comprehensive strategy. This puts business priorities at the heart of the approach to foundational technologies for overall digital transformation.

HCLTech ADvantage Workato is our way to ensure productivity and inclusiveness in Workato engagements of varied dimensions. It fulfills the exigencies and maintains a coherence in terms of

customer experience and operational agility, while realizing the overall vision for digital transformation. The solution accrues best practices from HCLTech's past project experiences, which are essential to create an ecosystem of frameworks and accelerators. This can augment and catalyze the Workato Integration project

execution. It enables the integration platform's key technology decisions related to monitoring, standardized frameworks, and other aspects that ultimately simplifies your integration ecosystem and accelerates delivery of integration solutions.

A set of accelerators, frameworks, and playbooks that facilitate speedy and consistent implementation of Workato based Integration projects.

HCLTech ROAR for Workato

A next-gen monitoring solution based on open- source frameworks, it delivers a rich console for real time service, APIs and KPI monitoring and reporting too.

Integration Competency Center Starter Kit

Jump start integration projects in the enterprise by providing reusable frameworks, best practices, conventions, standards, and guidelines for Workato implementations.

Integration-as-a-service offering

Includes all application development, application support, and platform management support activities. This packaged offering encompasses catalogue and consumption-based pricing which will cover Workato license costs. Access to best practices, standards and guidelines enabled by the CoE.

Workato Utils

Set of reusable scripts and utilities which come in handy for any Workato implementation. Includes Custom Connector for PEGA Applications and demos for Integrating with various key applications.

Figure 1: HCLTech's solution approaches for Workato Integration implementations

HCLTech's Real-time Operations and Analytics Reporting (ROAR)

Of late, business and IT users have stated an interest in looking at KPIs in real time. The business users' perspective include an intention of analyzing trends and opportunities. The IT users' perspective is focused on identifying failure reasons and quick problem resolution. What if we want to analyze a data set that is larger in size

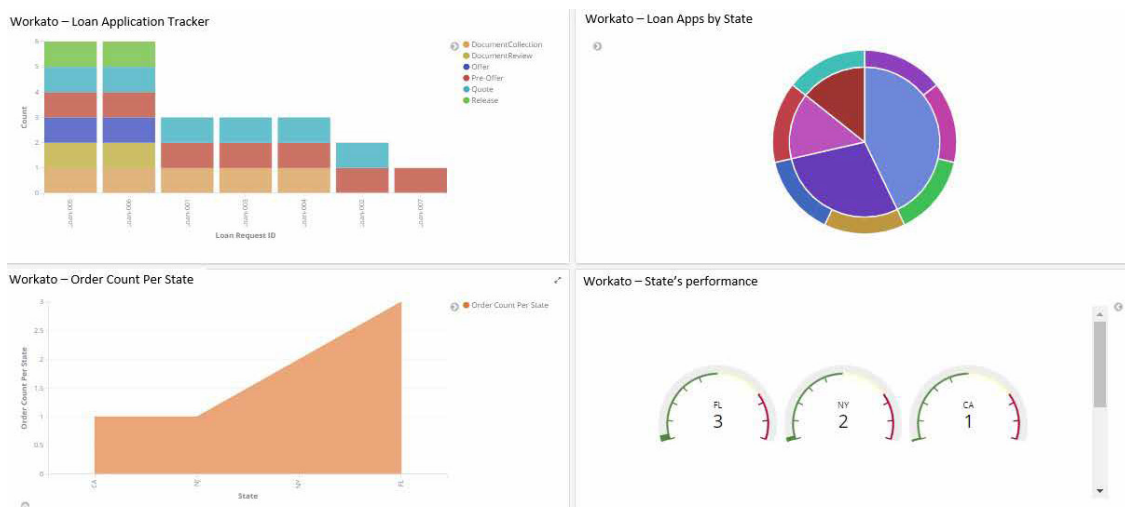

or for a longer period than allowed by Workato platform's data retention policies? How do we view Workato recipe dashboards through our enterprise-wide operational analytics dashboarding tool? How can we get complete end-to-end visibility of a transaction flow that spans multiple IT applications? HCLTech ROAR

framework provides an ELK-based, real-time view (operational as well as business) summarized by service, operation, partner etc. churning out visuals and dashboards. It is built on next-gen UI frameworks and enabled with a role-based access module, custom developed by HCLTech.

ROAR™ dashboards depicting recipe execution summary counts for various scenarios including repeated jobs

Another visualization depicting total executions in a day along with success/failure counts of recipe executions

Frameworks aggregates data from multiple data sources including Workato and enables end-to-end transaction visibility as it flows through your IT landscape

Figure 2: A granular and visible transaction view

ICC (Integration Competency Center) Starter Kit:

HCLTech's ICC setup pack for Workato is a comprehensive set of artifacts, templates, best practices, methodologies, and reusable services prepared by HCLTech.

This is based on years of experience in the field of service enablement and application integration within enterprises. It helps in

jump-starting ICC setup initiatives toward achieving goals of enterprise-wide integration solutions of distributed applications.

HCLTech Integration-as-a-Service offering:

Through this service offering, HCLTech offers both the Workato platform, as well as recipe design, development, and an Operations-as-a-Service model, all under a

single contract. All the aspects of Workato implementation, including license costs, is included as a single package solution. Best practices related to various

recipe design patterns, standards, and guidelines is supported by HCLTech's Integration Center of Excellence.

Platform & Application Management

All application & platform support management activities. Product license costs will be included as **Single package solution**

Catalog-based Pricing

Catalog pricing model based on service complexities and effort

Consumption-based Licensing

Tiered consumption -based model licensing – Configure to your needs

End-to-End Support

Platform, design, development & operations all under one contract

HCLTech Value Adds

Best practices, standards & guidelines enabled by CoE

Workato Utils:

These are a set of utilities such as reusable utility scripts and utility processes which come in handy for any Workato-based integration

implementation. This includes custom connectors for integrating with BPM tools. Also, demos and recipes on best practices of integration

solutions with various SaaS and on-premises applications such as Salesforce, Jira, SAP, File System, and few others, are included.

Benefits of ADvantage Workato

1

Standardized project execution leveraging artifacts relates to best practices, standards, and guidelines for Workato integration and automation development

2

Efficient operations of the Workato platform as standardization makes the recipes easier to manage and streamline the operating procedures

3

Reduced TTM and cost savings due to reuse of integrations artifacts and frameworks

4

A monitoring solution that spans beyond Workato, enabling real-time operational and business KPI reporting

5

HCLTech Integration as a service offering is a single package solution with all recipe development and platform support management activities along with Workato license costs

Figure 3: HCLTech's Workato Integration Platform-as-a-Service offering

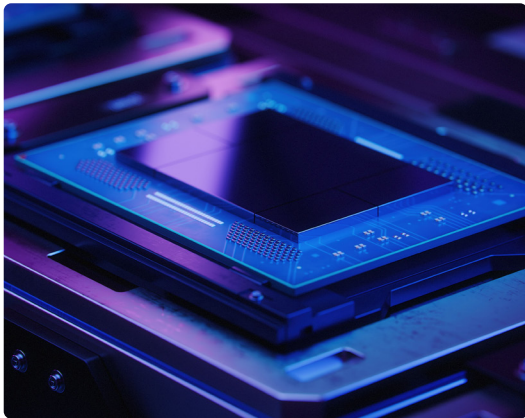

HCLTech's Workato Practice

HCLTech has a global alliance agreement and well-established Diamond-level partnership with Workato. HCLTech and Workato have collaborated on many opportunities offering effective and best-fit integration solutions to joint customers. HCLTech maintains a pool of certified consultants, developers, and architects to install, configure, and deliver

Workato-based automation and integration engagements. Today, a diverse set of applications are present in a customer's landscape, ranging from SaaS applications, IoT devices, mobile applications, legacy applications, extended partner integration, and others. Therefore, HCLTech understands that adopting an iPaaS and intelligent

integration and automation platform like Workato can help enterprise automation benefits such as secure data and application integration with greater flexibility, scalability, and reusability. Also, chatbot-driven automations besides modernization of legacy systems through their API fication is also a key advantage.

Business Impact

Leading American semiconductor company

- **300+** Automations implemented
- **16X** Faster employee onboarding/offboarding established
- **100%** L1 calls Automated
- Improved productivity, faster response to P1/P2

South East Asia's largest super app

- Delivered **200+ Automations**
- **30x faster** for IT teams to query the internal directory
- The client was able to save **200+ hours** of time per week

Leading US based digital entertainment technology platform

- Delivered **100+ automations** and improved B2B order processing to 10K orders per day
- Up to **2X faster** warehouse picking solution
- Huge time savings by unifying **9 brands** under one tech
- Seamless e-Commerce experience for partners & customers
