

Migrate+ for **SAP S/4HANA**

Transform at your own pace with our low-risk conversions

The benefits of digital ERP with minimal business change

You've spent years investing in SAP ERP — tailoring processes, building data and working hard to develop a system that reflects your business. The resulting ECC system likely supports some of your business needs today — but will it drive growth and innovation tomorrow?

The good news is that conversion to SAP S/4HANA brings the agility, scalability, access to SAP innovations and the competitive advantage that comes with implementing a new intelligent ERP — but at a significantly lower cost and risk than implementing a new greenfield system.

Whether your existing ECC system is heavily customized, or you just want to keep your data and core system design as-is, a conversion using HCLTech's Migrate+ for SAP S/4HANA is the lowest-risk way to move to the latest digital ERP — without the need for significant capital investment or disruptive business change.

With HCLTech's Migrate+ for SAP S/4HANA you can:

Protect your ECC investments

Retain the data, code and customization you need, retire what you don't, drive down TCO

Return to standard SAP processes

Optimize your processes, adopting standard SAP S/4HANA Best Practices where it works for your business

Deliver business benefits

Benefits include faster book closure, elimination of reconciliations, better insight into operations, reduced data footprint, improved UX and real-time supply chain planning

Leverage new technologies

Innovate and drive incremental value with SAP Business Technology Platform, AI, SAP Build Process Automation, Fiori, Mobile Apps, SAP Analytics Cloud and more

Industrialized migration + custom code optimization = **lower TCO**

HCLTech's multi-disciplinary team reduces conversion timelines using our automated industrialized delivery model and proprietary tools. This is supported by our Migrate+ Studio's highly-qualified conversion specialists – combining the reliability of automation with the flexibility and skills HCLTech has built a reputation on.

The key building blocks of HCLTech's Migrate+ for SAP S/4HANA are:

Experienced migration experts

Intelligent tooling and automated code remediation

Automated regression testing

Automated data transformation

Reduce custom code adaptation effort by **25% to 60%**

Migrate+ is supported by an HCLTech-developed proprietary toolset that has been optimized for intelligent automation – delivering faster migrations, even for systems with a high level of bespoke development. Our proprietary **custom code disposition and benchmarking tool** advises which code to retire, retain, simplify or convert into cloud extensions.

What does the plus in Migrate+ mean?

+Preparation

Data archiving, data quality, preemptive code remediation

+Value

Post-conversion program of agile value creation projects and innovation

+Elevate

Business case, target architecture, cloud integration and FinOps

+Futureproof

Futureproofed SAP landscape aligned to SAP reference architecture

Benefits realized: Migrate+ success stories

Migrate+ has been designed to deliver significant benefits for customers using on-premises ECC in all industries. For example:

IT Services

Performing real-time analytics on transaction data led to a 25%-40% reduction in processing time and a 50% reduction in global payroll processing time

Chemicals

Migration led to a 33% increase in MRP performance and a 55% faster release of the monthly forecast due to improved financial closing

Utilities

Migration of a complex IS-Utilities system for the first US Utility to go-live on RISE with SAP, including transformation of customer service with HCLTech's Intelligent Customer Engagement App

Oil & Gas

Migration enabled real-time decision making, streamlined and optimized processes, improved productivity through Fiori apps and tight integration with satellite apps via the SAP Business Technology Platform

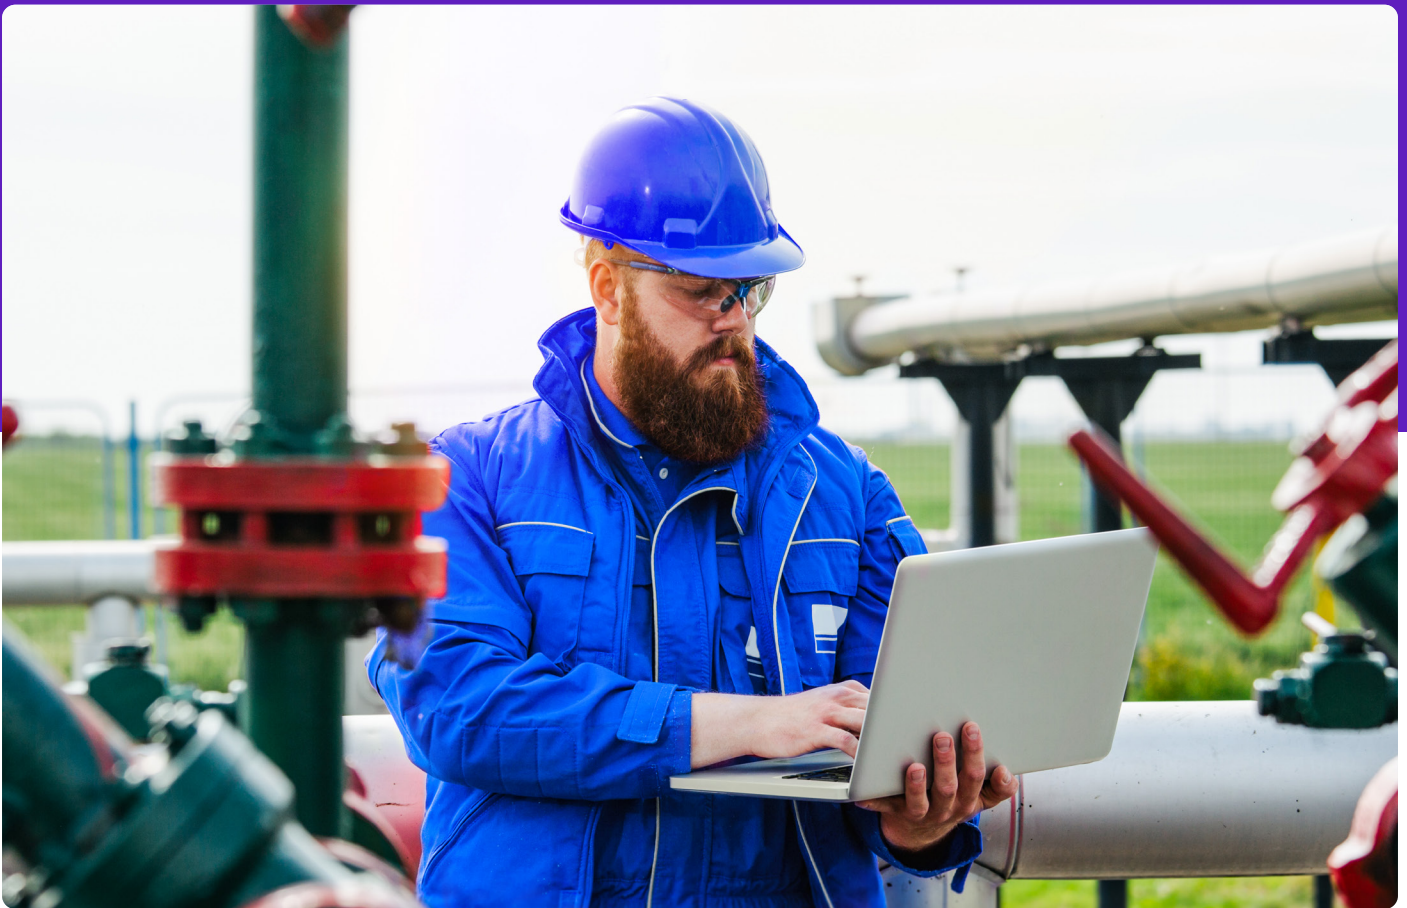

Migration packages mapped to your business needs

To keep things simple and affordable, we offer fixed-scope packages with T-shirt-sized pricing. Packages can also be supplemented with additional services, including business partner conversion, prerequisite upgrades, additional Fiori activation, archiving/rightsizing, cloud infrastructure provisioning or integration with other applications.
