

HCLTech managed attack path simulation (HCLTech M.A.P.S.)

Adding the attacker's context to bolster your
security defenses

Challenge overview

Modern enterprise's security overtime is getting even more complicated with the proliferation of so many different cybersecurity-related tools Also, too many activities many activities taking place across the organization's network at all times. We already know that even the most sophisticated of defense tech stacks haven't been able to deliver assurance against threat actors. With the growing sophistication of attack techniques, security tools are bound to be by passed more frequently, Hence it is imperative that we brace for impact.

New threats call for a new approach to the ways in which we've been looking at our defenses. By going from defense to offense, and assuming the threat of a breach at all times, we will be in a better position to address issues as they come along.

Service introduction

HCLTech's Managed Attack Path Simulation brings in a much-needed proactive approach to security by leveraging attacks to constantly improve defenses. With Managed Attack Path Simulation, you can use one singular platform to enable your security teams to visualize how attackers could reach your critical assets, There is guidance on the best places to eradicate and to focus on first. Make risk-free and informed decisions to protect your business with the added context of actual risk that a vulnerable, misconfigured or exposed credential possesses by opening an attack path toward critical assets.

What if you could

- Continuously validate and optimize the efficacy of your security posture
- See all hidden attack paths leading to your critical assets
- Put your security posture to the test against emerging and known threats
- Discover and mitigate gaps in your networks before an adversary does
- Take the smallest number of actions that have the biggest impact on risks
- Get a way to easily quantify cyber risks to your business

Service features

- Quick enablement with minimal overheads
- Delivered as a service from the cloud
- Continuous and safe attack path management
- Up-to-date attackers TTP
- Prioritized and guided remediation
- Security roadmap and strategic alignment workshops with HCLTech experts

Service benefits

- Eliminates blind spots
- Single comprehensive view of all critical attack paths across the hybrid environment
- Disrupt attack paths with actionable remediation recommendations
- Automated and continuous risk detection, prioritization and reduction
- Safe, scalable and quick service enablement

HCLTech | Supercharging Progress™

BE-112AI1304858496-EN00GL

HCLTech is a global technology company, home to 219,000+ people across 54 countries, delivering industry-leading capabilities centered around digital, engineering and cloud, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, Technology and Services, Telecom and Media, Retail and CPG, and Public Services. Consolidated revenues as of 12 months ending September 2022 totaled \$12.1 billion. To learn how we can supercharge progress for you, visit hcltech.com.
