Subject: Release – “HCLTech integrates NVIDIA AI Enterprise and Omniverse with HCLTech’s GenAI solutions”

Dear Sir/ Madam,

Enclosed please find a release on the captioned subject being issued by the Company today.

This is for your information and records.

Thanking you,

Yours faithfully,
For **HCL Technologies Limited**

Manish Anand
Company Secretary

HCLTech integrates NVIDIA AI Enterprise and Omniverse with HCLTech's GenAI solutions

NEW YORK and NOIDA, India, April 14, 2025—[HCLTech](#), a leading global technology company, announced that it has integrated [NVIDIA AI Enterprise](#) with its GenAI-led service transformation platform, [AI Force](#), and NVIDIA Omniverse with its physical AI solution, [SmartTwin™](#). These integrations aim to drive faster AI adoption for enterprises by streamlining software development cycles and enhancing engineering efficiency.

The NVIDIA AI Enterprise software—including NVIDIA NIM and NeMo Retriever microservices — along with the NVIDIA Llama Nemotron model family and NVIDIA AI Blueprints, will enable HCLTech's AI Force enterprise users to achieve accelerated release timelines, improved code quality and enhanced operational efficiency across coding, testing, legacy modernization, and process optimization.

Simultaneously, HCLTech's SmartTwin™ platform will harness NVIDIA Omniverse™, enabling enterprises to build interoperable data pipelines on [OpenUSD](#), integrate third-party engineering tools and run high-fidelity virtual simulations. The result: faster, more successful product launches and significant cost savings through optimized processes and reduced reliance on physical prototypes.

"AI is empowering enterprises to achieve operational excellence and business growth across industries. Our work with NVIDIA will bring a wide range of capabilities and benefits to businesses across industries as they adopt AI products and services across their operations," said Vijay Guntur, CTO and head of Ecosystems at HCLTech.

"Agentic and physical AI are transforming every industry from customer service and healthcare to manufacturing and logistics by automating complex workflows, optimizing operations and fostering sustainability and growth," said John Fanelli, Vice President, Enterprise Software at NVIDIA. "With the integration of the NVIDIA AI Enterprise and NVIDIA Omniverse technologies, HCLTech's AI Force and SmartTwin platforms can help businesses rapidly integrate AI and simulation technology into their operations."

About HCLTech

HCLTech is a global technology company, home to more than 220,000 people across 60 countries, delivering industry-leading capabilities centered around digital, engineering, cloud and AI, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, Technology and Services, Telecom and Media, Retail and CPG and Public Services. Consolidated revenues as of 12 months ending December 2024 totaled \$13.8 billion. To learn how we can supercharge progress for you, visit hcltech.com.
