About MetLife Stadium

[MetLife Stadium](#), located in East Rutherford, NJ, is the home of the New York Giants and New York Jets and has the largest seating capacity in the NFL (82,500). The venue is one of the busiest stadiums in the world and ranked No. 1 in the U.S. for tickets sold in 2025 per Billboard, who also named MetLife Stadium “Highest Grossing Stadium of the Year” nine times. The venue hosts the world’s biggest events on the world’s biggest stage, and in 2021 became the first NFL Stadium to join the UN Framework Convention on Climate Change's Sports for Climate Action Framework, which aims to achieve global greenhouse gas (GHG) emissions reductions goals.

About New York Jets

The New York Jets were founded in 1959 as the New York Titans and served as a charter member of the American Football League. Following the 1968 season, the team made history by becoming the first AFL franchise to win a world championship, defeating the Baltimore Colts in Super Bowl III—a victory widely credited with validating the AFL ahead of its 1970 merger with the NFL. Today, as one of the league’s flagship franchises in the nation’s largest media market, the Jets represent the sport on one of its biggest global stages.

The Jets enhance the fan experience through innovation and storytelling, including 1JD Entertainment, a digital content platform that connects fans across social and digital channels. The organization is also committed to community impact, supporting youth football, girls’ and women’s flag football, and programs serving disadvantaged communities throughout the tri-state area.

The Jets play at MetLife Stadium - one of the world’s most successful multi use venues - and are headquartered at the Atlantic Health Jets Training Center in Florham Park, New Jersey.
