HCLTech wins top honors at AWS GenAI Premier League (GPL) Awards 2025

LONDON, AMSTERDAM and NOIDA, India, June 27, 2025—HCLTech, a leading global technology company, has been recognized across all three categories—Productivity, Industry Transformation and Innovation—at the prestigious AWS GenAI Premier League (GPL) Awards 2025 in London and Amsterdam.

These awards underscore the depth of HCLTech's capabilities in driving transformative enterprise outcomes through Generative AI (GenAI).

It validates HCLTech's pioneering use of AWS's advanced GenAI services and Agentic AI solutions to deliver real-world impact across industries, driving improved efficiency, regulatory adherence and expedited decision-making across essential business functions.

HCLTech's Mainframe Modernization Accelerator, built with Amazon Bedrock, Multi-Agent Framework and Amazon Nova, speeds up mainframe modernization and migration to AWS. PriorAuth, an Agentic-AI solution, automates the Prior Authorization verification for insurance payers, revolutionizing the process. HCLTech's FraudShield enhances fraud detection in financial services and accelerates trade surveillance using real-time, AI-driven investigations.

"Being recognized across all categories of the AWS GPL is a reinforcement of our relentless focus on building industry-leading, transformative and innovative capabilities with AWS," said Prabhakar Appana, Senior Vice President and Global Head of AWS Ecosystem at HCLTech. "We are committed to building pathbreaking GenAI solutions through this partnership and are proud of our status as an AWS Generative AI Competency Partner," he added.

With increasing production-grade GenAI use cases, HCLTech continues to drive innovation in areas such as intelligent data platforms, customer experience transformation and Agentic AI. Its full-stack AI/GenAI capabilities enable clients to realize the transformative potential of GenAI in their digital transformation journeys.

About HCLTech

HCLTech is a global technology company, home to more than 223,000 people across 60 countries, delivering industry-leading capabilities centered around digital, engineering, cloud and AI, powered by a broad portfolio of technology services and products.
