

HCL AXON Presented with SAP® Mobility Showcase Award for SAP Partners

HCL AXON was presented with the SAP® Mobility Showcase Award for SAP partners at the SAPPHERE® NOW conference, recently held in Madrid. This award was presented in recognition of and to acknowledge SAP partners' enterprise mobility applications that demonstrate "the art of the possible" in mobilizing business processes and the mobile experience.

Following SAP's request for mobile application demos in August 2011, more than 200 applications were submitted by SAP partners across EMEA, as well as more than 100 submissions from DACH. SAP then selected 24 of the best partner application demos to be presented, alongside SAP solutions, in the mobility campus at SAPPHERE NOW in Madrid. From the 24, SAP shortlisted the final three partners to receive the SAP Mobility Showcase Award.

HCL AXON successfully showcased its EMEA mobility capability at the event and was selected as one of three finalists to receive this highly credible recognition. The award was presented to HCL AXON by Franck Cohen, president, SAP EMEA, and Michael Kleinemeier, CEO, SAP Deutschland AG & Co. KG, and president, DACH region, SAP, on stage at the Mobility & Innovation Spotlight theatre session on 9 November during the event.

Benedikt Hermann, head of Product Innovation, HCL AXON, said "We are delighted to have received the SAP Mobility Showcase Award for SAP partners. It clearly demonstrates that SAP values HCL AXON's approach to focus on the mobile enablement of business users and consumers within specific micro vertical scenarios such as "Meter-to-Cash" in the utilities industry.

All partner apps selected to be showcased onsite at SAPPHERE NOW in Madrid — from more than 20 partner organizations — have been built on or will soon be available on Sybase® Unwired Platform, the mobile enterprise application platform that enables enterprise developers to simply and quickly build enterprise-grade mobile applications that connect business data to mobile workers on most major devices.

"SAP commends HCL AXON's receipt of the SAP Mobility Showcase Award," said Franck Cohen. "Through SAP's partner ecosystem, we are offering customers even more choices when mobilizing their line-of-business and industry processes."

HCL AXON's mobile application suite includes:

- **mSAM-LA. Mobile Service and Asset management for Lean Assets:**
 - Designed for empowering field engineers to meet the service order requirements in time and to be able to perform tasks better and remotely for enhanced customer satisfaction
 - Currently being deployed at a customer site
