HCL Announces New Worldwide SAP Development and Support Contract with Celestica

September 17, 2007 – Sunnyvale, CA - **HCL Technologies Ltd. (“HCL”)**, India’s leading global IT services company, today announced it has expanded its relationship with Celestica, a global provider of innovative electronics manufacturing services (EMS), to provide SAP deployment and support. Under the terms of this three-year agreement, HCL will deploy and customize Celestica’s SAP suite in a global delivery model across Asia, North America, Latin America and Europe.

Through HCL’s global implementation and support methodology, Celestica and HCL will execute common processes and adhere to common governance structures under a fully managed service – executing customer-related projects more rapidly and achieving consistent levels of service worldwide.

“Our goal is to drive supply chain efficiencies and integrated global services to bring cost and time-to-market benefits to our customers,” said Lisa Charney, Chief Information Officer, Celestica. “We believe that our expanded relationship with HCL will help us to achieve this goal.”

“With the increasing complexity of the global supply chain, ensuring consistency and speed across the world is a key competitive advantage,” said Sandeep Kishore, Sr. Vice President, Hi-Tech and Manufacturing at HCL. “Having worked closely with Celestica over the past four years, we have an in-depth understanding of the intricacies of their business and are looking forward to implementing solutions that will help them deliver on their business strategy and mission.”

This new contract expands upon a four-year relationship between the two companies through which HCL and Celestica have successfully provided integrated solutions to customers across the telecom, enterprise, consumer, medical, aerospace and semiconductor sectors. Last year, the partnership was further expanded with a joint venture to provide a fully integrated product lifecycle solution to OEM customers – including product concept, design, engineering, manufacturing, fulfillment, sustaining engineering, reverse logistics and after-market services. HCL’s broad and scalable design engineering capabilities combined with Celestica’s existing strengths in hardware design for manufacturability and supply chain integration create an exciting new alternative for OEMs seeking time-to-market and total cost advantages.

About HCL Technologies

HCL Technologies is one of India's leading global IT Services companies, providing software-led IT solutions, remote infrastructure management services and BPO. Having made a foray into the global IT landscape in 1999 after its IPO, HCL Technologies focuses on Transformational Outsourcing, working with clients in areas that impact and re-define the core of their business. The company leverages an extensive global offshore infrastructure and its global network of offices in 17 countries to deliver solutions across select verticals including Financial Services, Retail & Consumer, Life Sciences & Healthcare, Hi-Tech & Manufacturing, Aerospace and Automotive, Telecom and Media & Entertainment (M&E). For the year ended 30th June 2007, HCL Technologies, along with its subsidiaries, had revenues of US\$ 1.4 billion (Rs. 6034 crores) and employed 42,000 professionals.
