

# HCL Optimus

HCL Optimus is an Analytics based Automation platform enabling a Do-It-Yourself approach to transform your Product Development Lifecycle.

## How does HCL Optimus transform the development, testing and sustenance process by leveraging analytics?

**Start here!**

### INTEGRATE ALL YOUR TOOLS FIRST

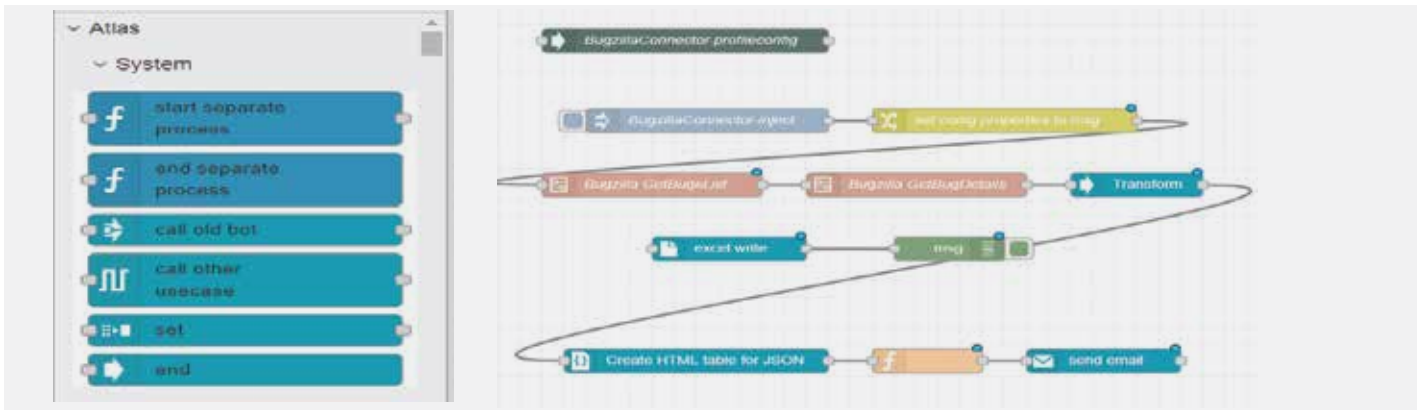

**Harness the capability of your existing tools**

Start with integrating the tools you already have such as HP ALM, PLM, ENNOVIA etc. using HCL's out-of-the-box connectors.

### AUTOMATE AND TRANSFORM WITH HCL OPTIMUS

**Use HCL's analytics based solution to automate and transform your processes**

Address the gap in your overall process automation through intelligent solutions provided by HCL Optimus. It also provides recommendations and insights using machine learning.

## AUTOMATE EVERYTHING BY DO-IT-YOURSELF

**Automate your engineering and operational activities just by Drag-n-drop**

Build use cases such as drawing comparisons, Rule-based document reviews, Inserting bug automatically to JIRA etc. with minimal programming.

## BROWSE READY-TO-USE ANALYTICS-BASED SOLUTIONS ON HCL OPTIMUS STORE

### Automate with HCL's intelligent use cases with the click of a button

Transform your process by using analytics-based solutions which is an amalgamation of HCL's decade old experience in testing and sustenance and Artificial Intelligence.

e.g. Natural Language Processing (NLP) based PDF processing.

## HARNESS THE POWER OF AI

### Get Insights & Recommendations

Make use of your data and get the most out of it. HCL Optimus analyses your test data, defect data and other various data and give you insights and recommendation.

## Why do you need HCL Optimus?

- **End-to-end automation**

DevOps and Agile requires end-to-end automation in a faster and reliable way. If the process needs to be seamless different phases of the product life cycle needs to be integrated seamlessly. HCL Optimus brings everything together and acts as a glue.

- **Intelligent insights and recommendations**

Your data can tell a lot about your system. Use of analytics will open up insights about your system which are not superficial ensuring that you do not miss anything critical.

AI-based recommendation can aid human productivity.

- **Automate your mundane task easily**

With HCL Optimus you can build your own use cases with a simple drag-n-drop with minimal programming so that you can automate the mundane activities and focus on things which matters.

## Key features of HCL Optimus

- **Out-of-box connectors**

Connectors to leading third party tools required in a PDLC

- **Do-it-yourself**

Use HCL Optimus studio to just drag-n-drop elements to build a automation cycle without any programming.

- **Plug-n-play AI-based solutions from HCL**

Use HCL's set of solutions which are analytics driven that are built utilising the AI and machine learning that gives you insights and recommendations.

## Key benefits

- Quicken go-to-market by 30% by integrating automation across Product Life Cycle.
- Save upto 40% effort across test automation life cycle through intelligent test suite optimization which prioritizes and executes the most critical test cases using machine learning.
- Reduce Mean time to resolve (MTTR) a defect by 10-20% by finding duplicate and similar defects, intelligent root cause analysis.
- Reduce Total Cost of Ownership (TCO) by up to 30% by saving bandwidth, productivity and through intelligent monitoring and insights.
- Process structured documents and unstructured data like Images, PDF etc across Product Engineering.

Hello there! I am an Ideapreneur. I believe that sustainable business outcomes are driven by relationships nurtured through values like trust, transparency and flexibility. I respect the contract, but believe in going beyond through collaboration, applied innovation and new generation partnership models that put your interest above everything else. Right now 137,000 Ideapreneurs are in a Relationship Beyond the Contract™ with 500 customers in 44 countries. How can I help you?
