

Simplify and Mobilize Your Business

Fiori Enterprise Applications from HCL and SAP

The Problem

The applications you use to run your business on a daily basis are mission-critical to the operation of your company; but how easy are they to actually use?

Traditional enterprise applications as they stand today require far too much training and are just too difficult to use effectively. They are often neither user-friendly nor intuitive, and while the engine behind them is undoubtedly the best there is, the usability of your applications and consistently poor user experience causes frustration and lower productivity among employees.

Equally as important, do your applications provide you with the flexibility to run your business anytime, from anywhere?

These operations are the core of your business, yet the applications used to carry them out restrict when and where they can be used.

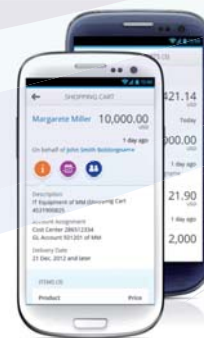

How Can HCL Help?

Having usable and flexible enterprise applications should be easy.

To achieve this, HCL has teamed up with SAP to sell and implement SAP's brand new suite of mobile business process applications called the **Fiori** Bundle.

Fiori is a collection of 25 mobile applications, each designed to make it significantly easier to carry out specific common tasks through a simple, sleek and intuitive mobile and web user-interface.

HCL's extensive experience in the mobility space along with our partnership with SAP makes us an ideal choice for organizations seeking to implement an easy-to-use mobile solution that far surpasses the outdated, cumbersome enterprise applications they have struggled with in the past.

“ We offer you a no-cost mobility workshop tailored to your business ”

Our Proposition

HCL will help you start mobilizing and simplifying your business processes. To do this, we are offering a no-cost mobility workshop tailored to your business, in which we help you design a mobility roadmap, develop a business case for the 'Fiori' suite of applications and prioritize those applications most important for your business. The workshop will include:

- High-level assessment of your current mobile landscape
- Focused session on business use cases with key business and IT stakeholders
- Post-workshop stakeholder briefing of findings, recommendations and next steps, including key considerations and risks.

The HCL Difference

Identified as a leading Enterprise Mobility Services Provider by Gartner, the HCL team combines industry expertise and mobile architects with decades of experience successfully implementing mobile initiatives.

With more than 1,250 dedicated mobility experts and 150+ mobility-enabled transformation projects successfully implemented across various platforms, our breadth and depth of experience will help your business identify and unlock the value of mobility.

Our mobility experts will partner with you to not only implement the **Fiori** bundle but to ensure you get the value you need out of this new class of enterprise applications.

The Next Step

For more information about the **Fiori** bundle and to schedule your own, cost-free mobility workshop, please contact us at hcleas@hcl.com.

About HCL

HCL is a leading technology organization with revenues of \$6.3bn and 90,000 employees operating from 31 countries around the world.
