

CLOUD NATIVE APPLICATION TRANSFORMATION

Migrate, replatform and refactor solutions to become Cloud Native running on VMWare Tanzu Kubernetes

DO YOU WANT?

Accelerate business using VMWare Tanzu?

Free your logjam of delayed migration projects?

Ingrain Cloud Native skills and learn how to modernize apps for Cloud Native using Tanzu?

Impartial advice from experienced engineers?

HERE'S WHAT HCL CLOUD NATIVE LABS CAN DELIVER...

- A modern environment, equipped with the latest tooling, focused on uninterrupted hands-on engineering and best practice learning
- Give you a hands-on introduction to the enhanced software development journey enabled by VMWare Tanzu
- Partner with experienced HCL engineers and Cloud specialists
- Migrate your application to VMWare Tanzu environments
- Transform your solution and support your investment with a business case supported by application performance, efficiency and developer productivity metrics

CLOUD FOUNDRY DEV-TEST ENVIRONMENT

A fully managed Cloud Native environment, ready for immediate utilisation by development teams

DO YOU WANT?

Accelerated migration of existing applications?

Development of new solutions targeting Kubernetes/Cloud Foundry?

Ready-to-run Kubernetes /Cloud-Foundry environments focused on accelerated Cloud Native engineering?

Support from Cloud Native developers who understand modern App dev techniques?

Focus on development, whilst the platform is managed and operated by a trusted partner?

HERE'S WHAT HCL CLOUD NATIVE LABS CAN DELIVER...

- Comprehensive, fully managed Tanzu Kubernetes environments optimized for development projects
- A modern environment, equipped with the latest CI/CD tooling, focused on hands-on Cloud Native software engineering
- Access to experienced, certified Cloud Native engineers to augment your own team
- A comprehensive Hybrid or Public Cloud platform fully supported by HCL Platform Reliability Engineers

CLOUD NATIVE ECONOMICS

Get the reassurance you need to undertake a Cloud Native journey

DO YOU WANT?

A business case to justify the investment in Cloud Native?

Reassurance that your migration journey is affordable?

Access to impartial & expert guidance?

HERE'S WHAT HCL CLOUD NATIVE LABS CAN DELIVER...

- Modelling the to-be environment and calculation of all related setup and operational costs
- Assessment of your applications portfolio and determine the migration costs
- An accurate calculation of existing operational / infra / licensing costs
- Impartial business case to justify the implementation of Cloud Native based environments
- Demonstrations of illustrative to-be environments

CLOUD FOUNDRY KICK START

Rapidly start your Cloud Foundry journey

DO YOU WANT?

See early value from your Cloud Native journey?

Quickly move the first 1-2 applications on to your chosen Cloud Foundry platform?

Reassurance that you are making the right engineering changes?

A trusted partner who can transform an application to become Cloud Native?

HERE'S WHAT HCL CLOUD NATIVE LABS CAN DELIVER...

- Assessment (Days 1-6): Analyse your applications portfolio to determine the effort and the appropriate treatments required to migrate. Find those essential applications with real business impact that will be the focus for kick-start migration
- Insight (Day 7): Next step is to determine the treatments to apply that will guide the replatforming, refactoring and migration of your solutions
- Modernization/Migration (Day 8-18): Migrate the apps to show the value of the platform. Implement suitable CI/CD approaches that will accelerate the complete journey

CLOUD FOUNDRY PROOF OF CONCEPT

Explore the impact of Cloud Native

DO YOU WANT?

Confidence that an approach based on Cloud Native will bring the anticipated results?

Test realistic scenarios to assess Cloud Native suitability?

Empower your team with cloud native skills and methodologies?

Enhance your capability to develop new products and services?

Access to expertise and impartial advice from Cloud specialists?

Exposure to 'real world' Cloud Native-based environments with demonstrations of achievable outcomes?

HERE'S WHAT HCL CLOUD NATIVE LABS CAN DELIVER...

- A hands-on introduction to the software development journey enabled by Cloud Foundry and associated Cloud Native methodologies
- An opportunity to join a balanced team of engineers and discover the impact Cloud Native will bring to your organisation
- Partner with experienced HCL engineers and cloud specialists
- Integrate domain related work with advanced cloud services
- Calculate the achievable outcomes should the PoC scenarios be taken in to production

CLOUD NATIVE STRATEGY WORKSHOP

Your Cloud Native journey starts here

DO YOU WANT?

Rapid creation of innovative new products & services?

Improved agility, speed and responsiveness?

Reassurance that you are taking the right approach to cloud adoption?

Select the Cloud Native distribution that is right for you?

HERE'S WHAT HCL CLOUD NATIVE LABS CAN DELIVER...

- A consultative workshop delivered by experienced Cloud Native professionals
- Recommend Cloud Native approaches that will enable your desired outcomes
- A deeper dive in to Cloud Native technologies
- Demonstrations, running on multiple Cloud Native environments, that illustrate scenarios relevant to your organisation
