

ADvantage™ Pega Upgrade & Migrate Solution

ADvantage™ Pega Upgrade & Migrate Solution is a methodological approach that helps customers embarking on Pega Upgrade or Migration initiatives to accelerate the implementation with automated scripts for platform readiness, pre- and post-upgrade activities, validation and certification. The objective of this solution is to standardize the operation, reduce the manual efforts and improve Pega application development and the overall operational efficiency.

Business Benefits:

Ease of usage, maintenance and configuration

Improved operational and effort efficiency

Catalyze the Pega Upgrade and Migration Initiatives

Reduce effort for pre and post migration or upgrade activity

Improved consistency and standardization of the upgrade tasks

Increased productivity and quality through automation

Reduce manual tasks that are mundane and error-prone

Automated application sanity check and certification

Pega Code Scanner focuses on performing design, security, and consistency analysis for Pega that will help improve Pega code quality and provide productivity improvement on Pega application development and Pega code review effort

A set of components to assess the application & identify the deprecated rules list, rule metrics, unused rules, and suggest any roadmap items based on the features of the Pega latest version of ADvantage Pega Upgrade

One-Touch Pega Upgrade / Migrate Scripts

A set of automated scripts for platform readiness certification, pre-upgrade validation, skimming (if need be), execute upgrade scripts, validate inventory details and application sanity post the upgrade orchestrated by an e2e process

Pega Code Scanner

Pega PAT (Pre-Upgrade Assessment Tool)

HCL ADvantage™ Pega Upgrade

Environment 360 portal

The one-stop operations portal to get a 360-degree view on the operational transactions in one portal than making the support teams act as keyboard-warriors by toggling multiple windows for fetching the info.

Pega Rules Impact and Reusability Index

e2e Test Automation Framework

Based on the Rules Referencing technique, identify the Pega Rules Reusability and Impact of Cascading rules as a result of a change introduced by a team.

An e2e Test Automation Framework covering unit-testing, functional testing, integration/API testing, load/performance testing, and security testing fast-tracking validation and certification process.

HCL Technologies, a Pega Strategic Consulting Partner, has more than decade-long relationship with Pega. And over the years, HCL has developed deep experience and a strong track record for delivering innovative process solutions, seamless Pega application development, and upgrades across myriad verticals.

Please reach out to the HCL Team, to perform a contextualized assessment of the existing Pega landscape and define the right approach & roadmap for the upgrade journey. And, catalyze the digital acceleration and tech-refresh of Pega programs by complementing it with the ADvantage™ Pega offerings.
