# Business Challenges for Cloud Adoption

**Concentrated Data Exposure** – With the migration of applications on the cloud, the IT environments of enterprises and cloud service providers have become prone to cyberattacks.

Security Compliance - With enterprises now sharing their IT infrastructures with cloud providers, the risk of non-compliance vis-à-vis security and regulatory norms has increased considerably.

**Governance and Control –** As IT resources become a shared responsibility between cloud providers and enterprises, a clear demarcation of responsibility has become difficult.

#### Lack of Expertise – The ever-changing nature of the cloud, coupled with an increase in the variety of workloads, has led to a steep rise in the demand of security architects to

manage complex environments.

# **Key Security Challenges**

Cloud migration and integration bring common security challenges that need re-architecturing of cybersecurity controls. Cloud adoption means agility, speed of execution, and keeping up with the innovation for the majority of customers. However, the context of security has changed with rapid cloud adoption and application migration/workload shift.

Challenges	Solution to address
Unmanaged users, BYOD, and systems	Identity and access management with contextual awareness
Data resides outside the perimeter	Data security and privacy
Hybrid cloud architecture	Platform security for cloud workloads
Direct access to cloud applications from public networks and home networks	Securing cloud workloads and applications with native/3rd party controls
Lack of activity visibility outside the traditional perimeter and who owns controls	Vigilance and monitoring of cloud activities and integra- tions with cloud security operations
Events outside the enterprise impacting operations	Resilience and incident response across the cloud
Reliance on ungoverned providers	3rd party risk and compliance with governance

## **CSaaS Introduction**

## 1. Solution Overview

With its Cloud Security as a Service (CSaaS) powered by Borderless Security reference framework, HCL helps customers easily migrate applications to the cloud without hampering security in any way, thereby keeping compliance requirements intact.

CSaaS provides comprehensive security to all kinds of cloud applications, viz. SaaS, laaS, etc., hosted anywhere, be it on a public cloud environment or private cloud/on-prem data center. It can also be accessed by all users from anywhere and on any device.

## 2. CSaaS Solution Highlights With Cloud Security-Centric Framework

CSaaS provides a roadmap to enhance cybersecurity risk and compliance management of enterprises by offering the following:

360-degree services comprising strategy and architecture, transformation and integration

Robust architectures for customers who are frequent targets of cyberattacks.

#### CLOUDSEC MONITORING SERVICE

Real time threat monitoring and incident response across the cloud environment

#### CLOUDEC UNIFIED VULNERABILITY MANAGEMENT SERVICE

Identification of gaps in cloud environment and mitigate them before their exploitation

**CLOUDSEC DATA SECURITY SERVICES** Service providing right data security

controls for critical & non-critical data on cloud

**CLOUDSEC IDENTITY SERVICE** Securing privileged and non-privileged user identities accessing cloud applications

Seamless delivery model for maintenance of security controls across customer environments

#### CLOUDSEC GOVERNANCE, RISK & COMPLIANCE

Cloud governance and compliance maintence with risk managemnet and reporting services

#### CLOUDSEC ADVISORY SERVICES

Advisory service to align and integrate security policies with business policies

#### CLOUDSEC PROTECTION SERVICE

Security for cloud workloads including vm's, containers, serverless and the network communications around them

## **CSaaS Solution Insights**

Multi-Platform Support

Partnership With Leading Vendors Across The Industry for The Most Optimum Solution

Skilled Architects Who Are Able to Meet the Dynamicity of The Cloud Environment and Provide the Needed Output

Cutting Edge Borderless Security Reference Framework to Improve on Security Posture Across a Hybrid Infrastructure and Meet the Next-Gen Security and Compliance requirements

Flexible Delivery Model Through Our CSFC's Spread Across the Globe

## Why HCL

Committed to driving cybersecurity and risk-aligned digital transformation, HCL offers enterprises the following differentiators:

- Use case-driven innovation environment built on leading tools and technologies that is designed to help customers address cloud cyber-attacks.
- Pre-built integrations to shorten time-to-value.
- Rich experience across a range of industry sectors with focus on regulations, standards, and cyber-attacks.

## A sneak peak of how CSaaS helped our clients ace their cloud security journey

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three lines of business - IT and Business Services (ITBS), Engineering and R&D Services (ERS), and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations, and next generation digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering while under P&P. HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities, and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing,

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability, and education initiatives. As of 12 months ending on December 31, 2020, HCL has a consolidated revenue of US\$ 10 billion and its 159,682 ideapreneurs operate out of 50 countries. For more information, visit www.hcltech.com
