

# HCL Migr8NXT for Red Hat Enterprise Linux

Enterprise OS Migration  
simplified

## Why upgrading your Red Hat Enterprise Linux (RHEL) OS is crucial?

While organizations across the globe take on expensive and innovative digital transformation initiatives, many continue to run and maintain their legacy RHEL OS. Running outdated OS exposes organizations to a host of challenges in terms of security, cost, and efficiency, and does not allow them to realize the desired value from their digital implementations.

**Organizations using the latest version of RHEL reported significant business benefits across most of their workloads:**

Reduced annual  
cost of software  
by 52%

Scaled down time  
spent for IT tasks  
by 25%

Lowered costs due to  
unplanned downtime  
by 5%

## RHEL 8: An intelligent foundation for your business

RHEL is the most widely deployed Linux platform across industries and within enterprises around the world. It provides a consistent foundation across environments and the tools needed to deliver services and workloads faster for any application.

### Key Features:

- ▶ RHEL 8 offers built-in manageability and integration with Red Hat management and automation products.
- ▶ It is a trusted, optimized platform for enterprise applications and critical databases, including SAP® HANA®, Microsoft SQL Server, and PostgreSQL, as well as machine learning workloads and popular independent software vendor (ISV) offerings.
- ▶ It extends your hybrid cloud infrastructure to the edge—across hundreds of thousands of nodes all over the world.

## Challenges to maintaining as-is business while planning for future disruptions

### Legacy OS challenges:

- ▶ **Security:** No longer actively patched or verified for security compliance, thereby exposing vulnerabilities
- ▶ **Skills:** Complicated system upgradation projects require highly skilled resources & advanced digital tools, resulting in extra cost, time & effort
- ▶ **Enhancements & compliance:** Unable to support new & emerging technologies
- ▶ **Cost of maintenance:** Generates instability in associated software performance and increases maintenance costs
- ▶ **Productivity:** Productivity hampered by poor & unreliable server performance, resulting in frequent disruptions

### Enterprise-Wide OS upgradation challenges:

- ▶ **Application compatibility:** Existing, day-to-day applications may not be compatible with new, upgraded OS
- ▶ **Data loss:** An enterprise-wide migration always runs the risk of data loss unless planned
- ▶ **Performance:** Version mismatch & configuration errors can affect efficiency of system applications
- ▶ **End of Lifecycle:** Legacy RHEL versions such as 5/6, are approaching the end of their lifecycles & will be obsolete soon

- **RHEL 5 no longer has Extended Lifecycle Support (ELS)**
- **RHEL 6 is entering product retirement and requires ELS**

All this can pose a potential risk for business-critical workloads.

# HCL Migr8NXT: Simplify Your RHEL Migration & System Modernization Journey

**Migr8NXT** is HCL's novel proposition to help enterprises seamlessly migrate to RHEL 7/8, without disrupting the as-is business workflow.

## Maintain As-Is Business Flow while Mitigating Future Risks with Migr8nxt

- End-to-end migration framework for upgrading your legacy RHEL OS to the most recent version
- Ensures mitigation of all known risks & continued adherence to Service Level Agreements (SLAs)
- Simplifies all complexities arising from dependencies, compatibility issues & skill requirements
- Ensures zero disruption to business value chain

## Migr8NXT is deployed across three key modules:

### Discovery & Assessment

Infrastructure Analysis

Application Analysis

Readiness and Risk Analysis

### Planning & Building

Strategic Migration Planning

Migration Tools and Framework

Migration Implementation

### Migration & Signoffs

Functional/Performance Testing

Runbook Update and Handover

Knowledge Transfer & Project Signoff

# HCL Migr8NXT: Key Differentiators

## 1. Expertise in Legacy Portfolio Migration

50+ rapid assessment of the as-is environment done to determine the best approach to OS upgradation

## 2. Excellence

- Mature Industrialized Methodologies for OS migration, consolidation, other functions
- Standardized Shared Service Operation Model
- Transformation & Optimization using HCL Gold Standard Best Practices

## 3. Skilled Resources

- 3000+ Linux / Unix resources
- Large pool of technology experts, SMEs and architects

## 4. Scale of Operations

- 400000+ Linux/Unix Servers
- 25+ Linux/Unix Versions supported
- 90+ different Hardware Models supported

- All major High Availability (HA) products supported

## 5. Cloud Native Labs

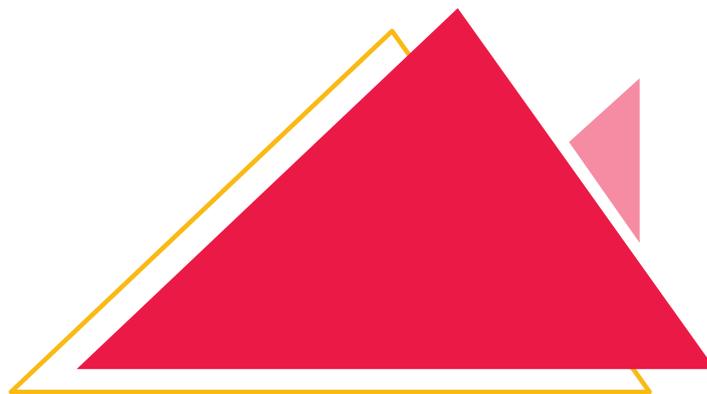

- Experienced consulting architects to guide the migration/upgradation of RHEL OS
- Hands-on development professionals to monitor & expedite the pace of the project

## 6. IPs & Framework

- HCL IPs accelerate application modernization
- Patented Assessment framework to evaluate the extent of upgradation required

## 7. 180+ Customers

Availing Linux OS supported across the globe, including 25+ Fortune 500/Global 1000 organizations

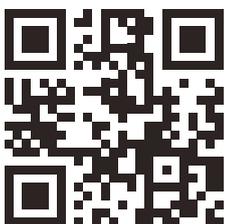

**HCL**

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three lines of business - IT and Business Services (ITBS), Engineering and R&D Services (ERS), and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations, and next generation digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering while under P&P. HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities, and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences, and Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability, and education initiatives. As of 12 months ending on June 30, 2021, HCL has a consolidated revenue of US\$ 10.53 billion and its 176,499 ideapreneurs operate out of 50 countries.
