

UNLEASH THE POTENTIAL OF UNIFIED COMMUNICATION & COLLABORATION

ASK YOURSELF!

- How do you unite previously incompatible audio, web and video conferencing technologies along with interoperability (e.g. **Skype/Lync**) and browser access through a multitude of devices?
- How do you provide a seamless user experience irrespective of the underlying communication platform (**Cisco, Avaya, Skype for Business**)?
- Have you wondered why most users blame their UC (Unified Communication) application for poor quality voice or video sessions when it's really the network causing the issue?

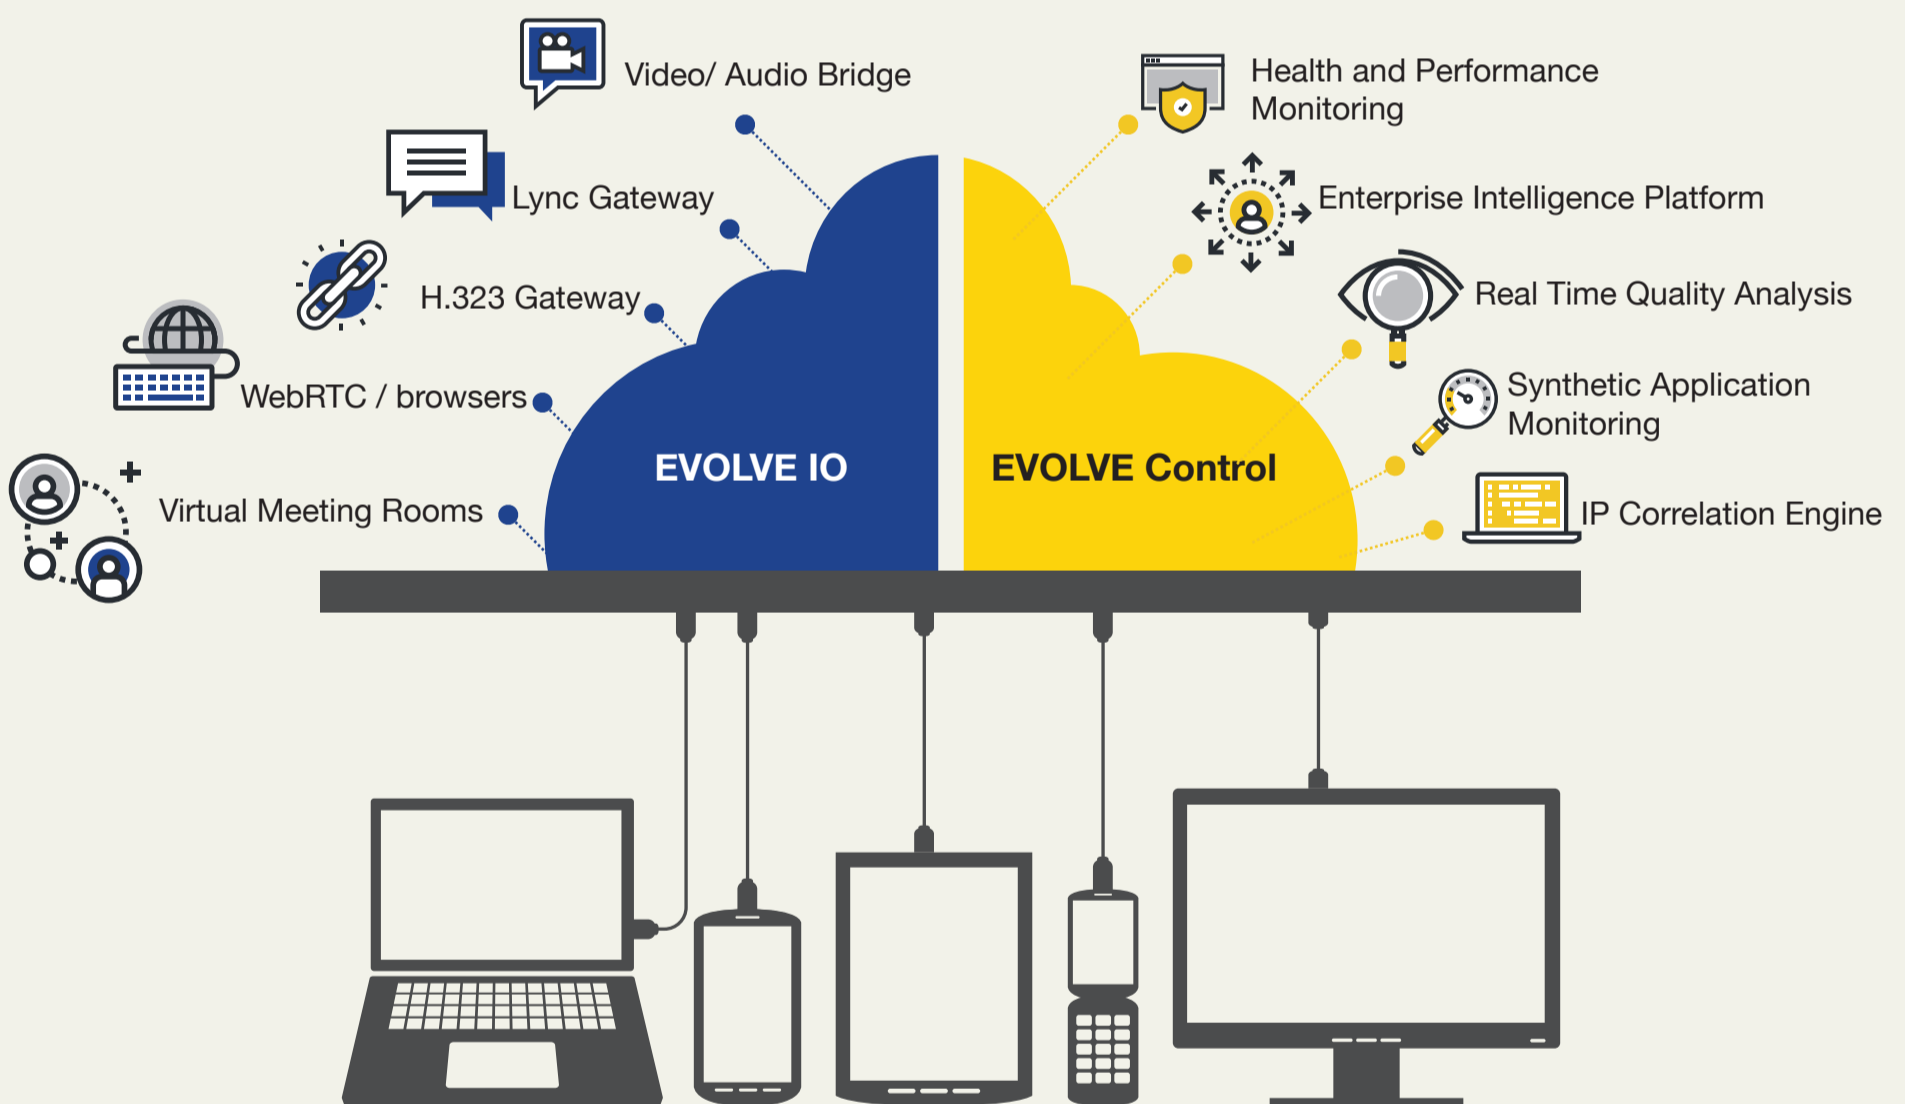

Interoperability- Enterprises wish to avoid “close gardens” and vendor lock-in, while enabling intercompany business-to-business (B2B), business-to-partner (B2P) and business-to consumer (B2C) federation. Additionally, many enterprises will find their needs best served by using several vendors, either because of legacy investments or to enable a best of breed configuration.

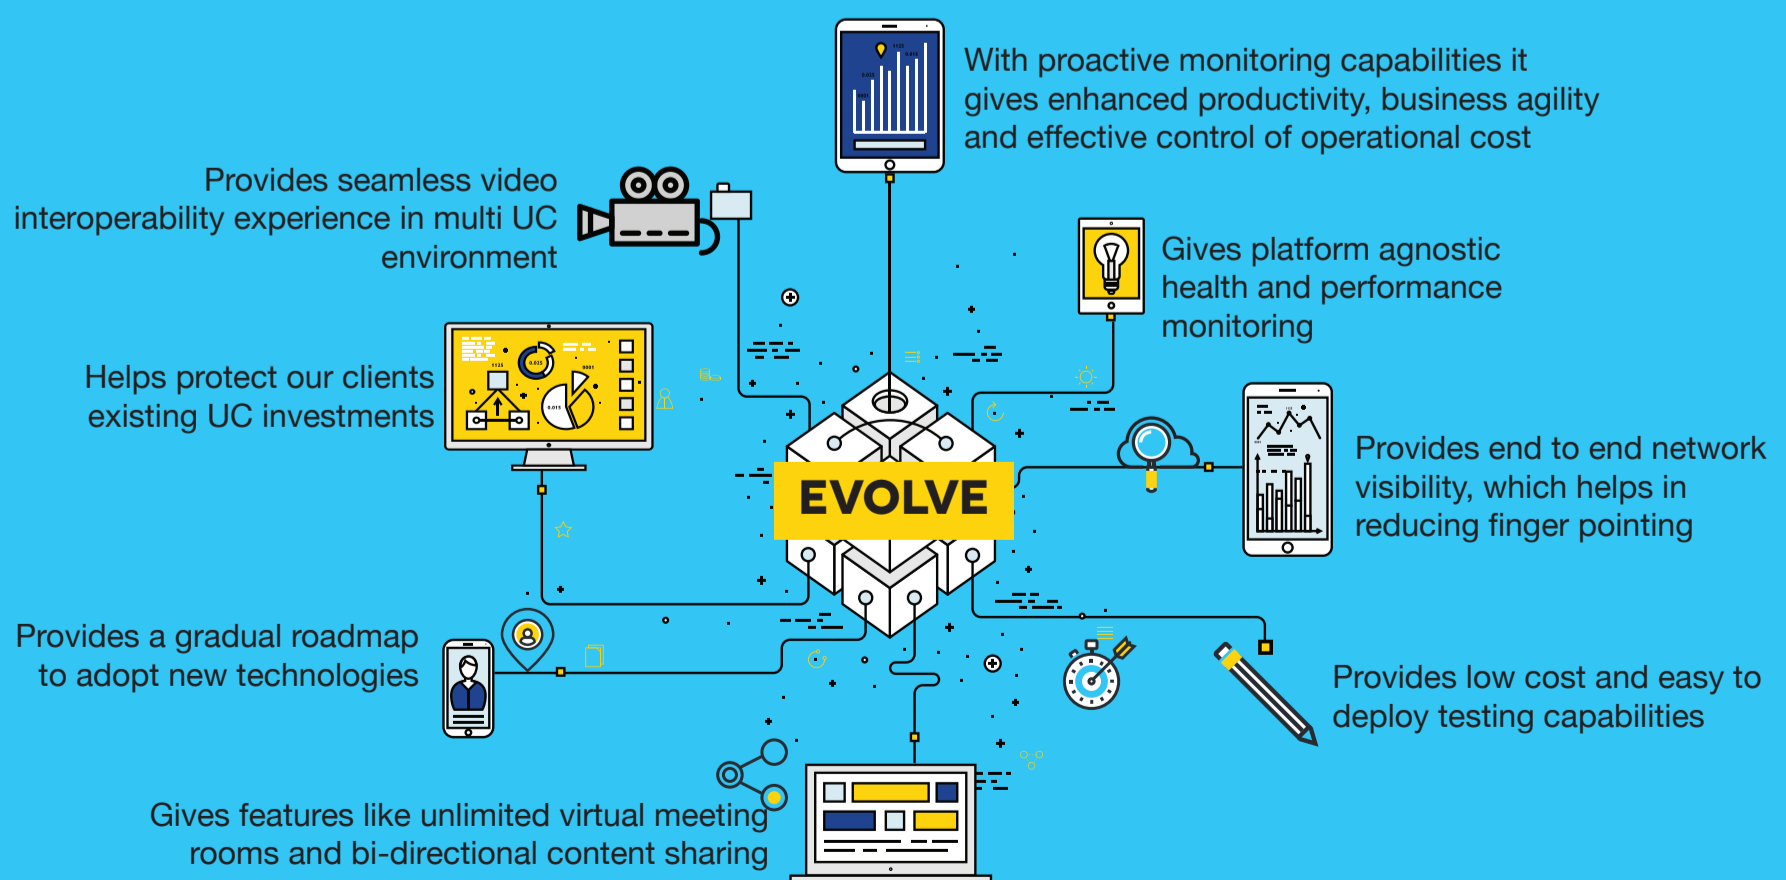

Gartner Magic Quadrant for Unified Communications August 4, 2014

EVOLVE is a single unified solution that emerged out of these necessities. supporting interoperability and end-to-end monitoring.

EVOLVE simplifies the Unified communication & Collaboration space, enabling the web of relations, stakeholders, to communicate freely, irrespective of their platforms. It ensures unprecedented call quality by providing end to end network visibility.

EVOLVE – A UC&C (UNIFIED COMMUNICATION & COLLABORATION) SOLUTION WITH FOLLOWING BENEFITS:
